## OBJECTIVE

---

Passionate and motivated B.E. IT student with knowledge of Python Backend Development, Web Development, Database Management, and Software Development concepts. Skilled in problem-solving, API development, and working on real-world projects during internship experience. Eager to apply technical skills, learn new technologies, and contribute effectively to organizational growth in a dynamic work environment.

## EXPERIENCE

---

### Python Backend Developer Intern – Ocius Technologies LLP

Jan 2026 - March 2026

Completed a 3-month internship focused on Python Backend Development, working on projects involving Web Development, API development, backend logic, database operations. Gained hands-on experience with Python framework, problem-solving, and collaborative software development practices.

## EDUCATION

---

### Bachelor of Engineering in Information Technology

Expected 2026

SAL Engineering and Technical Institute, Ahmedabad.

Current CGPA: 8.43

## TECHNICAL SKILLS

---

|                               |                                         |
|-------------------------------|-----------------------------------------|
| Programming Languages         | Python, C                               |
| Frameworks & Web Technologies | FastAPI, Django, HTML, CSS, JavaScript. |
| Database                      | MySQL, PostgreSQL.                      |
| Tools & Platforms             | Git, GitHub, VS Code, Antigravity       |

## PROJECTS

---

### EduSphere - Student Management System

Developed EduSphere, a role-based educational management platform with secure authentication for Admins, Teachers, and Students. Implemented separate dashboards for each user role, along with features such as strong password validation, attendance and marks management, assignment handling, and database-driven academic operations using Python backend technologies to improve efficiency and user experience.

### FooteeZ - Footwear E-Commerce

Developed FooteeZ, a footwear e-commerce platform using Django 5.2.4 with buyer/seller authentication, product management, cart and wishlist features, and Razorpay payment integration. Implemented responsive UI, secure session handling, OTP-based password recovery, and SQLite database management for efficient user and product operations.

### Email Management System

Developed an Email Management System using Django and MySQL with user authentication, secure email sending, and file attachment support. Implemented Gmail SMTP integration, form validation, responsive Bootstrap UI, and session management for efficient email operations.

## ACHIEVEMENTS & CERTIFICATIONS

---

- Member of ISTE Student Chapter — SAL Education.
- Part of Design Engineering Team (Sem 3–6), overseeing project execution and team coordination.
- Participated in Invictus - 2025 - University Cricket Tournament.
